

# My Digital Studio

---

## 1.0.1.611 Update

### Fixes

#### **Lock Page functionality**

Software does not allow editing of pages when they are locked.

#### **Preview Project**

Two blank pages will no longer display in the preview.

#### **Photo Album Wizard**

The wizard no longer adds two extra pages for both photo cover and non-photo cover albums when the project had 22 or more pages.

#### **Calendar Wizard**

Calendar wizard no longer allows printing of calendars that are less or more than 25 pages.

#### **View Menu**

Rulers and guides may be on by default in My Digital Studio but their menu items were not checked. These items are now checked to be accurate in their default settings.

#### **Share Project**

Burn to DVD-Video now checks for midi audio before proceeding, as midi audio is not supported on DVD Players.

#### **Font issues**

Various fonts were repaired, including certain symbol-based fonts that potentially caused program errors.

### Enhancements

#### **New Cover Guide option**

Housed under the View/Guides menu, this option provides guides for displaying areas for hardcover photo book cover creation.

#### **Updates**

Improved the application updates system with a built-in service. This allows My Digital Studio to check for, download, and update itself without requiring the user to search for the correct update file on the web.

### Modifications

#### **Maximum spine text size**

A maximum of 11 pt has been set for spine text.

#### **Photo Album Bleed Area guide**

This guide has been renamed and modified. It is now called the Photo Page Bleed Area and has been modified to allow for more bleed on areas sewn together in printing.

#### **Default guides for photo album bleed area**

Guides have been modified to provide more space for book binding.
