INSTRUCTIONS

1

Place Bigz™ XL Die on a Cutting Pad with foam side up.

2

Place paper or desired material to be cut on top of the die. Place the second Cutting Pad on top of the paper or material to create a "sandwich."

3

Cut using either Sizzix BIGklic™ or Big Shot™ Machines.

Embellishing Tips 101

How to Use the Heart Cutout
This die is designed to create heart-shaped cutouts from paper, cardstock, or other materials. To use the die, place the paper on the cutting pad, place the die on top, and cut with a Sizzix machine. The heart cutouts can be used for various projects, such as scrapbooking, cardmaking, and gift tags.

Instructions

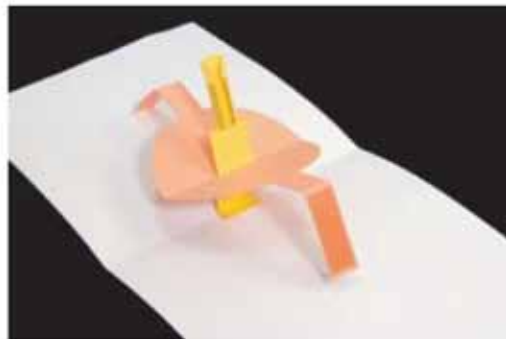

1. Die-cut shapes from material of choice (cardstock recommended). Crease shapes on all score lines. Cut three strips of paper 7/8" wide and 10 3/8", 8 3/8", 5 7/8" long.

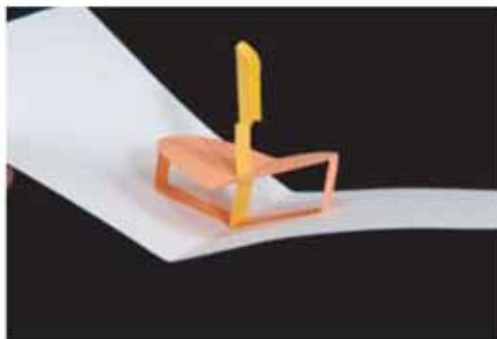

2. Fold in the locking flaps on the sides of the column piece. Align the crease of the bottom flap with the center crease of your card and adhere with strong double-sided tape.

3. Apply adhesive to the end tabs on each tier.

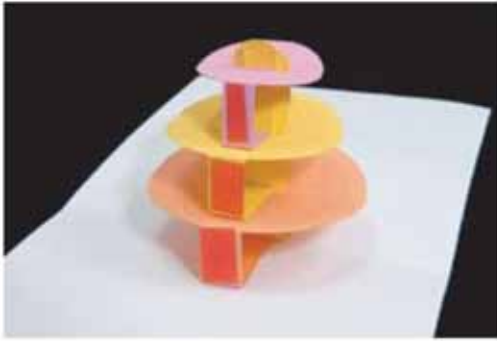

4. Slide the largest Cake tier down the center column until it stops. Then open the set of locking flaps directly above the tier.

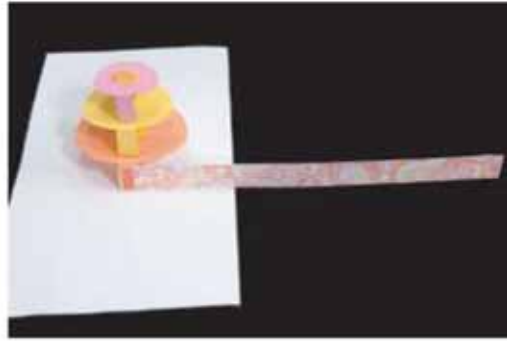

5. Fold both tier end tabs underneath the tier until they touch the center column and adhere.

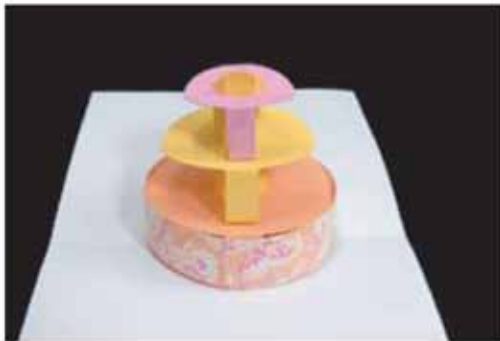

6. Repeat steps 4 and 5 for the middle and top tiers.

7. Apply adhesive to vertical side tabs of each tier.

8. Attach the end of the longest strip (10 3/8" x 7/8") to the bottom tier. Place another piece of double-sided tape (no wider than the vertical side piece of the tier) on top of the already-adhered end as shown.

9. Wrap the strip evenly around the bottom tier and adhere the ends together. Ends should have a 1/2" overlap.

10. Repeat steps 8 and 9 with middle and top tiers.

11. Gently fold card closed and apply firm pressure to crease paper strips in the correct position.

12. Open the card, and the Cake pops up! Add the preferred Cake topper and embellish.
