

# My Digital Studio Downloads

## Downloading My Digital Studio Content

Periodically, My Digital Studio will have downloads available that feature Stampin' Up! products, including stamp sets, exclusive papers, colors, and accessories. You can find these downloads in the store located on your Stampin' Up! demonstrator's business web site.

When you order through a Stampin' Up! demonstrator, not only will you find all of Stampin' Up!'s product offerings, you'll also receive a product discount and you'll be eligible to receive Stampin' Rewards. Plus, a demonstrator will be able to help you learn how to use the products you've purchased as well as provide project ideas and fun techniques.

To find a demonstrator, visit [stampinup.com](http://stampinup.com) and click **Find a Demonstrator**. You can also find Stampin' Up!'s products—including the downloads—in Stampin' Up!'s online store on the Stampin' Up! web site.

### To download My Digital Studio content:

1. Go to your demonstrator's online store or the Stampin' Up! online store ([www.stampinup.com](http://www.stampinup.com)).
2. If this is your first visit, you'll need to set up an account. Follow the steps to set up your account. Your account is where you will access your downloads.

Once you've created your account, the Stampin' Up! online catalog will open. In the catalog you'll find all the products that you can order through Stampin' Up!, including digital versions of Stampin' Up! products that you can use with My Digital Studio.

3. Add the products you want to your shopping bag.

Downloadable products are identified with the downloadable icon  .

4. After you've made all of your selections, check out and complete your purchase.

If you are ordering through a Stampin' Up! demonstrator and your order qualifies for Stampin' Rewards, you can select your rewards before checking out. You can learn more about the Stampin' Rewards program on your demonstrator's business web site. Click **Stampin' Rewards** on the bottom of your demonstrator's online store page to learn more.

5. After you've checked out, an **Order Confirmation** page will open. Click the **Download Now** link next to the product you want to download, or click Download Manager.

Clicking on either will open Download Manager. Download Manager will list all the products that you have purchased for download.

6. In Download Manager, click the operating system you are using (Mac or Windows).

After you select your operating system, the file sizes appear next to each of the available downloads.

7. To download a file, click **For My Digital Studio**.

If you click **For Other Applications**, Download Manager will download a version of the file that can be used in other programs, such as Adobe Photoshop.

8. When prompted, click **Run**.

Click **Run** to have the image automatically placed in My Digital Studio so it will be available the next time you open My Digital Studio.

We do not recommend that you click **Save**. If you click **Save**, your computer will save the file to your hard drive, and you will have to locate the saved file and run it (double-click, and then click **Run**) before the image is placed in My Digital Studio. (If you click **Save**, be sure to record where you saved the file.)

9. Repeat steps 7–9 for each download file that you've purchased.

Download Manager has a section for past downloads. Your Stampin' Up! store account will maintain a record of the downloads you've purchased and will keep them available for future download. If you ever need to download a file again, visit your account and access Download Manager.
